

Performance Considerations in OpenLayers Based Web Mapping

Andreas Hocevar <ahocevar@opengeo.org>

Today's trick list

1. Load OpenLayers The Right Way
[Greenhorn](#) - [Pro 1](#) - [Pro 2](#)
2. Know Your Config Options
[Greenhorn](#) - [Pro 1](#) - [Pro 2](#)
3. Group Your Layers
[Greenhorn](#) - [Pro 1](#) - [Pro 2](#)
4. Use a Server Side Cache
[Greenhorn](#) - [Pro 1](#) - [Pro 2](#)
5. Combine OGC Services Wisely
[Greenhorn](#) - [Pro 1](#) - [Pro 2](#)

All examples above write benchmarking output to the Firebug Lite console. Click the beetle in the bottom right corner to bring it up.
